Technical Centre of Excellence

Christie Innomed has created the **Technical Centre of Excellence (TCoE)** in Montreal and Toronto. The TCoE centralizes national experts providing proactive and responsive support in addition to the infrastructure needed for our customers and our Field Service Team.

With this level of support, our service team has the ability and backup to resolve equipment technical issues.

High Quality Maintenance Service

We have experience with large Multi Vendor Service (MVS) contracts and currently oversee equipment from most major manufacturer. We have experience with:

- ✓ G.E.
- ✓ Siemens
- ✓ Canon (Toshiba)
- ✓ Philips
- ✓ Shimadzu
- ✓ Carestream
- ✓ Fujifilm

We bring a level of flexibility and contract customization to each account that other vendors cannot. Christie Innomed has the ability to provide full-time on-site Diagnostic Imaging Service Technicians. These technicians may be dedicated to our customer sites and will significantly improve our call response time which results in reduced downtime and increases productivity.

We also have the ability to provide remote monitoring and diagnostic services on modalities such as MRI, CT, IR, and PET/CT regardless of the OEM, provided the modality supports this functionality. Other parties can only provide remote monitoring and diagnostics on their own equipment or not at all.
